

EnviroCircuit E-Waste Plant Begins Commercial Production

The EnviroLeach/Mineworx Joint Venture's Greater Vancouver E-Waste recycling plant *EnviroCircuit* has commenced preliminary commercial production.

- Commissioning now complete
- Entering revenue stage of operations
- Initial 3 tonne per day throughput target of printed circuit boards (PCB's)
- Increasing to a single-shift, 5 tonnes per day by January 1st, 2020
- Additional shifts added to achieve 20 tonnes per day during Q2

“This is a significant milestone for the EnviroCircuit facility, positioning it at the forefront of commercial viability and environmentally-friendly E-Waste recycling.” – Greg Pendura, CEO
